Re: Avtex Fibers Site, Front Royal, Warren County, Virginia.

Dear Mr. Murray:

Upon my arrival at the Avtex Fibers Site on November 5, 1991, I observed several activities being conducted at the Site of which EPA was not aware. These activities included: the removal of the covered walkway leading from the main gate area to the shipping number five area, the departure of numerous truckloads of material that were supposedly only temporarily staged on site by Joe Repetto, prior to shipment to Venezuela and lastly the removal of equipment from the powerhouse.

I would like to assure you that EPA has no desire to prevent or impede the removal of assets from the Avtex Site, however in order to maintain safe and productive operations onsite we request that you or your onsite representative notify the onsite EPA representative, Vincent Zenone, Harry Daw or Bonnie Guy-Gross 24-hours prior to the commencement of such activities. We feel that this requirement will further the current cooperation that we have enjoyed to date.

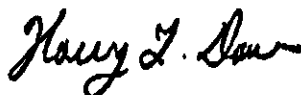

Additionally, I would like to bring to your attention your responsibility to submit periodic progress reports to EPA concerning the estate's liquidation and/or demolition plans pursuant to EPA's August 28, 1990 Administrative Order as subsequently modified on June 19, 1991. As you know, the EPA Order, as modified is still in effect. To date EPA has not received a progress report from you regarding the activities that you are conducting at the Avtex Site.
